C. Assignment of Drivers to Automobiles

Youthful operators are assigned first. The applicable youthful operator classification shall be assigned separately to the number of automobiles equal to the number of youthful operators. The youthful operators shall be assigned to the insured vehicles as follows:

i. Each youthful **principal** operator shall be assigned to the vehicle on which he or she is defined as the owner or principal operator. If the operator is the principal operator of more than one vehicle, then assign the operator to the vehicle which he or she customarily operates.

ii. The youthful **occasional** operator with the highest classification rating factor shall then be assigned to the vehicle he or she customarily operates. If that vehicle has already been assigned, then this youthful operator is assigned to the unassigned vehicle with the highest premium (immediately prior to applying the classification rating factor).

iii. The youthful **occasional** operator with the next highest classification rating factor shall be assigned to the vehicle he or she customarily operates. If that vehicle has already been assigned, then this youthful operator is assigned to the unassigned vehicle with the highest premium.

iv. This process continues until all youthful operators have been assigned to an automobile, or there are no more vehicles to assign.

For the remaining vehicles in excess of the number of youthful operators, classification shall be assigned based on the use and principal operator of the vehicle.

b. that the vehicle involved in the accident was:

(1) lawfully parked (a vehicle rolling from a parked position shall not be considered as lawfully parked), or

(2) struck in the rear by another vehicle, and has not been convicted of a moving traffic violation in connection with the accident, or

(3) struck by a "hit-and-run" driver if the accident is reported to the proper authorities within 24 hours, or

This exception does not include an accident occurring after the vehicle ceases to be used in response to such emergency.

iii. Violation

A violation means conviction of a major or minor moving traffic violation which occurred during the experience period involving the insured or any operator currently resident in the same household while operating a vehicle insurable under the rules of this manual.

a. Major Violations

a. “Any operator currently resident in the same household” shall include a regular operator who is not resident in the same household and is not separately insured.

b. The word “conviction” shall include a plea of guilty; or nolo contendere; or determination of guilt by a jury or by a court though no sentence has been imposed or, if imposed, has been suspended; and a forfeiture of bail or collateral deposited to secure appearance in court of the defendant, unless the forfeiture has been vacated.

c. No surcharges are assigned for incidents incurred by an operator demonstrated to be a named insured or principal operator of a vehicle insured under a separate policy.

C. Administration of the Plan

(1) for the first accident in the experience period - 25 percentage points.

(2) for each accident in excess of one and up to four in the experience period - 75 percentage points.

(3) for each accident in excess of four in the experience period - 100 percentage points.

b. If there were one or more minor violations during the experience period, the experience modification shall be determined on the basis of the total number of minor violations by adding the following:

(1) for the first minor violation in the experience period - 0 percentage points.

(2) for the second minor violation in the experience period - 25 percentage points.

(3) for each minor violation in excess of two and up to five in the experience period - 75 percentage points.

(4) for each minor violation in excess of five in the experience period - 100 percentage points.

c. If there were one or more major violations during the experience period, the experience modification shall be determined on the basis that a major violation is considered three minor violations. Refer to b. above to determine the percentage points applicable.

d. The experience modification for each owned automobile shall be determined by adding 100% to the sum of a., b. and c. above.

Notes applicable to Administration of the Plan

(1) Multi-car Risks

When two or more automobiles are insured in the same policy, each operator will be identified with one automobile as follows:

(a) the automobile assigned under the classification rule, or

(b) if the operator cannot be assigned under (a), then the automobile with the highest combined Bodily Injury Liability, Property Damage Liability, Comprehensive and Collision premium.

(b) If a single occurrence results in an accident and one minor violation, then only the accident will be considered and the concurrent violation will be totally disregarded in determining surcharges.

(c) If a single occurrence results in an accident and major violation(s), then both incidents shall be considered surchargeable.

A factor shall be applied if a driver has an unverifiable motor vehicle report meaning we do not have a reported history of the most current three year period. To avoid the application of this factor, insureds should currently have an Arkansas driver's license. Included in this category are persons who have an international license. An international license is considered to be a license from anywhere except Canada, the fifty United States or Washington, D.C.

Exceptions:

If the driver is military personnel or a student, an unverifiable MVR factor due to an out-of-state license is waived.

If the driver is licensed less than 3 years and has a current Arkansas driver's license, the unverifiable MVR factor is waived.

RULE 34 – RENEWAL PREMIUM CAPPING

Policy renewal premium changes shall be capped at plus or minus 25% for annual policies and plus or minus 12.5% for semi-annual policies based on the application of a Rate Cap Factor.

The capped renewal premium shall be calculated as follows:

The expiring full term premium is compared to the uncapped new full term premium, and if the amount of premium increase/decrease is greater than the rate cap percent listed above, the Rate Cap Factor will be calculated by multiplying the expiring full term premium by one plus/minus the rate cap percent, dividing by the uncapped new full term premium and rounding to three decimal places. When the expiring full term premium is a capped premium, the comparison done above is to the capped premium.

The premium associated with a surcharge for experience modification or a policy tier adjustment shall not be included in the premiums used to calculate the Rate Cap Factor. State fees (if applicable) are also not included in the calculation. Policies with suspended liability coverage are not eligible for renewal premium capping.

The Rate Cap Factor shall apply to the policy premium for the entire policy term, and shall not be recalculated for midterm adjustments to the policy. The Rate Cap Factor will apply to the premium for all vehicle level and policy level coverages on the policy.

RULE 35 – MASS MERCHANDISING ACCOUNT TRANSFER PREMIUM CAPPING

The Mass Merchandising Account Transfer Premium Capping program is used with eligible groups who choose to participate with Metropolitan in improved marketing methods designed to increase participation in the group automobile program. The purpose of this capping program is to reduce the policyholder premium disruption that could result from an insured electing to transfer his or her policy to Metropolitan.

Participants who choose to enroll via the alternate cost saving methods within a specified timeframe on effective dates will receive a capped premium described below.

1. The capped premium shall be determined as follows:

   For annual policies, at conversion to new business with Metropolitan, a 5% premium discount will apply to the policyholder’s prior carrier rate, and then premium may increase or decrease by no more than 10% at each of the next two renewals.

   For semi-annual policies, at conversion to new business with Metropolitan, a 5% premium discount will apply to the policyholder’s prior carrier, and then premium may increase or decrease by no more than 5% at each of the next five renewals.

   After the specified number of renewals, the statewide general renewal premium cap will apply.

2. The capped premium shall be calculated as follows:

   The expiring full term premium of the policyholder’s former company is compared to the uncapped new full term Metropolitan premium, and if the amount of premium increase/decrease is greater than the rate cap percent listed above, the Rate Cap Factor will be calculated by multiplying the expiring full term premium by one plus/minus the rate cap percent, dividing by the uncapped new full term premium and rounding to three decimal places. If at subsequent renewals, the expiring full term premium is a capped premium, the comparison described above is to the prior term capped premium.

   The Rate Cap Factor shall apply to the policy premium for the entire policy term, and shall not be recalculated for midterm adjustments to the policy. The Rate Cap Factor will apply to the premium for all vehicle level and policy level coverages on the policy.

Policyholders whose prior insurance was with Metropolitan are not eligible for this option.

Metropolitan Group Property and Casualty Insurance Company

Arkansas Automobile Rate Revision

Revision Introduction

The automobile rates currently in use by Metropolitan Group Property & Casualty Insurance Company were filed with the Arkansas Department of Insurance effective November 20, 2012 for new business and December 25, 2012 for renewal business.

The following statewide revisions are proposed:

I. Rate Change

Liability	No Fault	Physical Damage	Total
3.6%	10.0%	-4.8%	-0.3%

II. Summary of Changes

1. **Base Rates**
   Base Rates have been revised by territory and coverage.

2. **Model Year Factors**
   Factors for Model Year 2014 have been added to the Rate Pages for Comprehensive and Collision coverages.

3. **Mass Merchandising Account Deviations**
   Several account deviations have been revised.

4. **Introduction of Affinity as Group**
   We are refiling our definitions for our mass marketed/merchandising program to better align with the marketplace. Included for your review are our revised Group Insurance Program definitions which clarify the groups of individuals we intend to include in our program. Also included are our revised Rule 24, Rule 25, and Rule 35 which have been updated to coincide with the changes made to the Group Insurance Program definitions.

   Lastly, we are introducing a deviated rate factor of 0.90 for individuals associated with an organization or entity that has agreed to make our program available through that organization or entity. As there is currently no business written with these aforementioned organizations, there is no premium impact.

5. **Introduction of VRG 9 (Rule 11)**
   With this revision, the VRG program has been redesigned. This program assigns factors based on the vehicle's Model Year, Make, Model and Body Type. VRG factors no longer vary by tier. VRG Column 9 assigns 24 groups, ranging from A-W, and Z (Z is for vehicles which cannot find a match in our assignment).

6. **Rule 34 – Renewal Premium Capping**
   Policies with suspended liability are not eligible for renewal premium capping.

7. **Introduction of GrandProtect**
   A new product, GrandProtect is introduced in this revision. GrandProtect provides a package approach for insuring property and casualty exposures and a higher level of coverage differentiation from other MetLife Auto & Home products. GrandProtect policies must include both auto and home exposures and may protect additional exposures of the client such as boats, motorcycles and an umbrella liability layer. Automobile GrandProtect Products are priced through a GrandProtect Factor and a GrandProtect Flat Amount. The following is a summary of changes with the introduction of the GrandProtect product:

Profit Provision Summary

Insurance companies, like most companies, must compete for capital in the competitive market place. In order to compete for capital, an insurance company must provide a return on equity that is commensurate with the risk assumed. According to the Actuarial Standard of Practice No. 30 - Treatment of Profit and Contingency Provisions and the Cost of Capital in Property/Casualty Insurance Ratemaking, "Property/casualty insurance rates should provide for all expected costs, including an appropriate cost of capital associated with the specific risk transfer." Metropolitan reflects the cost of capital in the ratemaking process in the selection of the underwriting profit provision.

Metropolitan incorporates an Underwriting Profit Provision in the rate-making process using the Total Financial Needs Model. This model develops an underwriting profit provision such that the sum of underwriting profit, miscellaneous income (non-investment), investment income from insurance operations and investment income on capital, after income taxes, equals the target cost of capital. In the following model, Metropolitan calculates the underwriting profit which will ensure that the anticipated income from all sources produces net income after taxes that is commensurate with the risk assumed in the property-casualty insurance business.

Metropolitan targets a 15.0% return on equity based on the variability of industry property and casualty insurance results. After taking investment income and miscellaneous income into account, the selected underwriting profit provisions of 7.5% for Personal Automobile Liability and 13.8% for Personal Automobile Physical Damage achieve a 15% cost of capital.

It should be noted that Metropolitan includes Investment Income from Equity in the Profit Provision model. The assumed premium-to-equity ratio is 1.1 to 1.0. This represents a conservative and prudent pricing strategy.

Line A.2.

The mean unearned premium reserve is determined by multiplying the direct earned premiums in line A.1 by the countrywide ratio of the mean unearned premium reserve to the direct earned premium for 2011 for Private Passenger Automobile Liability and Physical Damage insurance.

Deduction for prepaid expenses:

Production costs and a large part of the other company expenses in connection with the writing and handling of Automobile insurance policies, exclusive of claim adjustment expenses, are incurred when the policy is written and before the premium is paid. Therefore, the deduction for these expenses is determined by use of the provisions for expenses used in our ratemaking procedures as shown.

Line B.2.

Delayed Remission of premium:

This deduction is necessary because of delay in collection and remission of premium to the companies, which amounts to approximately 50 to 75 days after the effective dates of the policies. Therefore, funds for the unearned premium reserve required during the initial days of all policies must be taken from the company's surplus.

Agents' balances for premiums due less than 90 days are added to the agents balances charged off or uncollected premiums overdue for more than 90 days.
