Filing Description:

Technology Insurance Company, Inc. (TIC), a participant of Insurance Services Office (ISO), is submitting this filing to reduce its approved loss cost multipliers (LCM) from its initial Commercial Automobile filing.

TICs rates will be the combination of ISOs loss costs and loss cost multipliers of 1.49 for Commercial Property, as shown on the enclosed state filing forms. As noted on the attached forms, this loss cost multiplier will remain on file and apply to all subsequent prospective loss cost filings unless otherwise notified.

The overall rate level impact of this filing is -14.6%.

The proposed changes included in this filing are based on the following:

1. The proposed loss cost multiplier reflects TIC managements revised estimates of general expenses as well as any

changes in the tax provisions.

2. The current loss cost multiplier reflects TIC managements best estimates of the costs of doing business as a startup operation. Now that TIC is no longer a startup operation, we propose to adjust the loss cost multiplier to reflect changes in expenses.

3. Changes in tax provisions are based on our research and on ISOs annual expense and tax analysis. The final Taxes, Licenses, and Fees (TL&F) selections represent our best estimate of future TL&F liabilities for this line of business.

Enclosed for your review:

State Required Filing Forms

Commercial Property State Exception Pages

With the exception of the loss cost multiplier and related expected loss ratios, all other rules and rating values are the same as currently approved for use by TIC.

\$100.00 has been transmitted via EFT through the SERFF system to cover the required filing fee.

We propose that this filing become effective for all policies effective July 15, 2007.
