NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The statutory basis financial statements of Golden Rule Insurance Company (the "Company") are presented on the basis of accounting practices prescribed and permitted by the State of Indiana Insurance Department (the "Department").

The Department recognizes only statutory accounting practices, prescribed and permitted by the State of Indiana, for determining and reporting the financial condition and results of operations of a life, accident, and health insurer, for determining its solvency under Indiana Insurance Law. The state prescribes the use of the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") in effect for the accounting periods covered in the statutory basis financial statements.

No significant differences exist between the practices prescribed and permitted by the State of Indiana and the NAIC SAP which materially affect the statutory basis net income and capital and surplus, as illustrated in the table below:

	SSAP #	F/S Page #	F/S Line #	September 30, 2018	December 31, 2017

B. Use of Estimates in the Preparation of the Statutory Basis Financial Statements

No significant change.

C. Accounting Policy

(1–5) No significant change.

(6) U.S. government and agency securities and corporate debt securities include loan-backed securities (mortgage-backed securities and asset-backed securities), which are valued using the retrospective adjustment methodology. Prepayment assumptions for the determination of the book/adjusted carrying value, commonly referred to as amortized cost, of loan-backed securities are based on a three-month constant prepayment rate history obtained from external data source vendors. The Company's investment policy limits investments in nonagency residential mortgage-backed securities, including home equity and sub-prime mortgages, to 10% of total cash and invested assets. Total combined investments in mortgage-backed securities and asset-backed securities cannot exceed more than 30% of total cash and invested assets.

(7–13) No significant change.

D. Loan-Backed Securities

(1) U.S. government and agency securities and corporate debt securities include loan-backed securities (mortgage-backed securities and asset-backed securities), which are valued using the retrospective adjustment methodology. Prepayment assumptions for the determination of the book/adjusted carrying value, commonly referred to as amortized cost, of loan-backed securities are based on a three-month constant prepayment rate history obtained from external data source vendors.

(2) The Company did not recognize any other-than-temporary impairments ("OTTIs") on loan-backed securities as of September 30, 2018.

(3) As of September 30, 2018, the Company did not have any loan-backed securities with OTTIs to report by CUSIP.

- (4) The following table illustrates the fair value, gross unrealized losses, and length of time that the loan-backed securities have been in a continuous unrealized loss position as of September 30, 2018 and December 31, 2017:

	September 30, 2018
The aggregate amount of unrealized losses:	
1. Less than 12 months	\$ 273,058
2. 12 Months or longer	1,747,639
The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 months	54,595,264
2. 12 Months or longer	44,003,722
	December 31, 2017
The aggregate amount of unrealized losses:	
1. Less than 12 months	\$ 172,844

The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 months	38,078,199
2. 12 Months or longer	25,355,468

- (5) The Company believes that it will collect all principal and interest due on all investments that have an amortized cost in excess of fair value. The unrealized losses as of September 30, 2018 were primarily caused by interest rate increases and not by unfavorable changes in the credit ratings associated with these securities.

D. The Tax Cut and Jobs Act (“Tax Reform”) enacted by the U.S. federal government in December 2017 changed the existing United States tax law including reducing the U.S. corporate income tax rate to 21% beginning in 2018. The ratio between the provision for federal income taxes incurred and net income before federal income taxes and net realized capital gains (losses) has changed from the prior year primarily due to the Tax Reform, partially offset by the annual health insurer fee (“HIF”) under Section 9010 of the Patient Protection and Affordable Care Act (“ACA”). The HIF is included in the statutory basis statement of operations, but is non-deductible for income tax purposes in 2018. The Company is required to expense 100% of the estimated annual fee on January 1, 2018. The Company’s health insurer fee expense is \$25,917,638 in 2018, which will be paid in September 2018. Due to the moratorium in 2017, there was no HIF included in the 2017 statutory basis statements of operations.

20. FAIR VALUE MEASUREMENT

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and short-term investments are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source, prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services have not historically resulted in an adjustment the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

A. Fair Value

(1) Fair Value Measurements at Reporting Date

The Company does not have any financial assets that are measured and reported at fair value in the statutory basis statements of admitted assets, liabilities, and capital and surplus at September 30, 2018 and December 31, 2017. However, the Company does consider its investments in LIHTC investments as a Level 3 investment even though no market valuation was required as of September 30, 2018 and December 31, 2017. As there is no readily available market, these securities are recorded at book/adjusted carrying value and considered held to maturity as they will not be sold.

- (2)** The Company does not have any financial assets with a fair value hierarchy of Level 3 that were measured and reported at fair value for the nine months ended September 30, 2018 and the year ended December 31, 2017.

STATEMENT AS OF SEPTEMBER 30, 2018 OF THE Golden Rule Insurance Company

The Company does consider its investments in LIHTC investments as a Level 3 investment as there is no readily available market. As a result, these investments are recorded and reported at book/adjusted carrying value of \$12,123,952 and \$13,551,364 as of September 30, 2018 and December 31, 2017, respectively.

- (3) Transfers between fair value hierarchy levels, if any, are recorded as of the beginning of the reporting period in which the transfer occurs. There were no transfers between Levels 1, 2 or 3 of any financial assets or liabilities during the nine months ended September 30, 2018 and the year ended December 31, 2017.
- (4) **Investments** — Fair values of debt and equity securities are based on quoted market prices, where available. The Company obtains one price for each security primarily from a pricing service, which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, and, if necessary, makes adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, benchmark yields, credit spreads, default rates, prepayment speeds and non-binding broker quotes. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by a secondary pricing source, such as its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and reviews of fair value methodology documentation provided by independent pricing services have not historically resulted in adjustment in the prices obtained from the pricing service.

LIHTC Investments — The Company does consider its investments in LIHTC investments as a Level 3 investment even though no market valuation adjustment was required as of September 30, 2018 and December 31, 2017. Since there is no readily available market, these securities are recorded and reported at book/adjusted carrying value and considered held to maturity as they will not be sold. Should any contractual breakage occur that jeopardizes the ability to receive the tax credits associated with these securities, impairments will be recognized. As of September 30, 2018, all of these investments are performing in accordance with their original contract terms.

- (5) The Company has no derivative assets and liabilities to disclose.

B. Fair Value Combination — Not applicable.

E. Risk-Sharing Provisions of the Affordable Care Act

(1) The Company has accident and health insurance premiums in 2018 and 2017 subject to the risk-sharing provisions of the ACA.

The ACA imposed fees and premium stabilization provisions on health insurance issuers offering comprehensive commercial health insurance. The three premium stabilization programs are commonly referred to as the 3Rs – risk adjustment, reinsurance, and risk corridors.

Risk Adjustment – The permanent risk adjustment program, designed to mitigate the potential impact of adverse selection and provide stability for health insurance issuers, applies to all non-grandfathered plans not subject to transitional relief in the individual and small group markets both inside and outside of the insurance exchanges. Premium adjustments pursuant to the risk adjustment program are accounted for as premium subject to redetermination and user fees are accounted for as assessments.

Reinsurance – The transitional reinsurance program was designed to protect issuers in the individual market from an expected increase in large claims due to the elimination of preexisting condition limitations. The transitional reinsurance program was effective from 2014 through 2016 and applied to all issuers of major medical commercial products and third party administrators. Contributions attributable to enrollees in ACA compliant individual plans, including program administrative costs were accounted for as ceded premium and payments received were accounted for as ceded benefit recoveries. The portion of the individual contributions earmarked for the U.S. Treasury was accounted for as an assessment. Contributions made for enrollees in fully insured plans other than ACA compliant individual plans, including program administrative costs and payments to the U.S. Treasury, were treated as assessments.

Risk Corridors – The temporary risk corridors program, designed to provide some aggregate protection against variability for issuers in the individual and small group markets during the period 2014 through 2016, applied to Qualified Health Plans in the individual and small group markets both inside and outside of the insurance exchanges. Premium adjustments pursuant to the risk corridors program were accounted for as premium adjustments for retrospectively rated contracts.

- (2) The following table presents the current year impact of risk-sharing provisions of the ACA on assets, liabilities and operations.
