NOTES TO FINANCIAL STATEMENTS**1. Summary of Significant Accounting Policies****A) Accounting Practices**

MCNA Insurance Company ("Company") prepares its financial statements in accordance with accounting and reporting practices prescribed by the National Association of Insurance Commissioners (NAIC) Accounting Practices and Procedures Manual, which was adopted by the Texas Department of Insurance, and constitutes what is referred to as the Statutory Basis of Accounting. Such accounting and reporting is significantly different than generally accepted accounting principles (GAAP) in the United States; and therefore, the accompanying financial statements do not intend to present financial position, results of operations, and cash flows in accordance with GAAP.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Texas is shown below:

B) Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions concerning dental costs, investment valuation and other factors that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities as of the date of the statement of admitted assets, liabilities, capital and surplus, and the revenues and expenses for the three months ended March 31, 2018. Such estimates are based on historical experience and other assumptions that are considered appropriate in the circumstances. However, actual results could differ from those estimates and these differences may be material.

C) Accounting Policies

Based on the Company's contracts with various Medicaid agencies, capitation fees are recorded as revenue except for those deemed to be advances under the terms of the contract. Advance premiums are reflected as unearned and recognized as revenue when earned. For the three

NOTES TO FINANCIAL STATEMENTS

At Year end, the Company's estimate for the cost of dental services incurred but not reported is computed by an independent actuary using standard actuarial methodologies. Data gathering and audit testing are nearly complete for the Agency's SFY 2015 year review. There is no material pending or threatened legal action against the Company. The likelihood or outcome of current or future suits cannot be accurately predicted. In addition, the potential for increased liability for negligence arising from claim adjudication, along with increased litigation that has accompanied negative publicity and public perception of the industry, adds to this uncertainty. 20. Fair Value Measurements

Generally accepted accounting principles require that certain assets and liabilities be measured at fair market value while allowing the option to carry certain other assets and liabilities that were not previously measured at fair value at their previous carrying value. In this connection, fair value measurements establish a hierarchy to prioritize the computation of fair value. Such hierarchy consists of a) - valuations based on quoted prices in active markets for identical assets or liabilities (Level 1), b) - valuations based on observable quoted prices for similar assets and liabilities in active markets (Level 2), and c) - valuations based on inputs that are unobservable and are supported by little or no market activity, therefore, requiring management's best estimate of what market
